SUMMARY

Information Technology student with a strong interest in Frontend Development and experience building web-based projects using modern technologies. Skilled in developing user-focused interfaces, implementing responsive designs, and working with structured project architectures. Experienced in team collaboration, project coordination, and event management through various organizational roles.

EDUCATION

Universitas Tarumanagara <i>Bachelor of Informatics Engineering 5th Semester</i>	2024 – Now
SMA Kristen IPEKA Pluit	2021 – 2024

PROJECTS

Sruput | Front-End Developer | Individual Project

- Developed Sruput, a React-based beverage customizer app with real-time pricing, cart, and checkout flow.
- Built reusable component architecture and global state management (Context API) for a multi-page ordering experience.

MetaJaya Shop | UI/UX Designer, Front-End Developer, & Database Manager | Group Project

- Designed and implemented the UI and front-end for the login and privacy policy pages.
- Managed and structured the Supabase database, ensuring data was properly organized and accessible to the front-end.
- Contributed to the development of a customer-facing online store and admin CMS using a modern API-based architecture.

TuneTalk | Emotion Detection & Music Recommendation Developer and Research Paper Writer | Group Project

- Implemented an emotion detection model using Python to identify emotions for the chatbot's music recommendation system.
- Expanded the song database and recommendation scope based on detected emotions.
- Led the research paper writing for the project's intended publication in MIND Journal.
- Contributed to the development of a hybrid chatbot combining emotion detection, retrieval, and mood-to-music mapping.

SentosaQuiz | Project Coordinator & Documentation Lead | Group Project

- Contributed to the application concept and user flow, helping define the overall structure and functionality.
- Coordinated and documented the project's development process and application details for future reference.
- Maintained project documentation to ensure key decisions, processes, and references were properly recorded.

Foodie.id | UI/UX Designer & Flutter Developer | Group Project

- Designed and developed the food and beverage catalog using Flutter, covering both UI/UX design and front-end implementation.

ORGANIZATIONAL EXPERIENCE

Permanent Member of the Secretariat Department – BEM FTI UNTAR Managed the department's administration, documentation, and correspondences.	2025 – 2026
Junior Member of the Secretariat Department – BEM FTI UNTAR	2024 – 2025

INFORMAL EDUCATION

Math & English Courses – Kumon, Jakarta Utara Received the Advanced Student Honour Roll Award (2014) for both programs.	2010 – 2018
